4. WHAT IS A COOKIE?

- 4.1 Cookies are text files containing small amounts of information which are downloaded to your device when you visit a website. Cookies are then sent back to the originating website on each subsequent visit, or to another website that recognises that cookie. Cookies are useful because they allow a website to recognise a user’s device.
- 4.2 Cookies do lots of different jobs, like letting you navigate between pages efficiently, remembering your preferences and generally improve your website experience. They can also help to ensure that adverts you see online are more relevant to you and your interests.
- 4.3 Most websites you visit will use cookies in order to improve your user experience by enabling that website to ‘remember’ you, either for the duration of your visit (using a ‘session cookie’) or for repeat visits (using a ‘persistent cookie’).
- 4.4 Cookies may be set by the website you are visiting (‘first party cookies’) or they may be set by other websites who run content on the page you are viewing (‘third party cookies’).

5. HOW DO WE USE COOKIES ON THE WEBSITE?

A list of the categories of cookies used on the GATS Platform is set out below.

5.1 Necessary Cookies

Essential website cookies are required for technical reasons in order for the GATS Platform to operate and remain secure. We refer to these as “essential” or “strictly necessary” cookies. Such essential cookies also include functional cookies which are strictly necessary to allow you to use some of the features of the GATS Platform in order to receive and access your requested service. For instance, these cookies can be used to remember changes to any parts of the web pages, or any choices you have made, for the purposes of accessing your requested service, such as page navigation or your cookies and language preferences. Because these cookies are strictly necessary to deliver the GATS Platform and a number of its features, you cannot refuse them without impacting how the GATS Platform functions.

5.2 Other Cookies including Analytics Cookies

Analytics cookies collect and report information about how visitors use the GATS Platform or its features. These cookies don’t collect information that identifies a visitor. All information these cookies collect is aggregated and, therefore, anonymous. These cookies are only used to improve how the GATS Platform and its features work. Although important to us or to the relevant third party sites who run content on the GATS Platform, these cookies are non-essential to the use of the GATS Platform and its features. You can block or delete them by changing your browser settings, as described in this Notice. However, without these cookies, certain functionality may become unavailable.
